

Quick Start Guide

What's Included:

- 1 - Remote Device
- 1 - Display Device
- 1 - Stylus
- 4 - Mounting Nails
- 1 - Cat5 Cable for Remote Device
- 1 - Power Cord for Display Device
- 1 - Wall Charger for Display Device

Creating an Account

Note: If you already have an account, skip to setting up the device.

1. Visit www.controlmydehu.com, then click create an account.
2. Follow the prompts to complete registration.
3. Once done, you will be redirected to the log in screen.
4. After logging in, click "Register New Device" in the side menu bar to create a homeowner account.
5. Follow the prompts to complete registration. Note that you will need the Display ID on the display device.

Note: Depending on your role, some Enterprise accounts require a submitted request and a follow-up verification call from Seaira Global before activation. To avoid delays, we highly recommend requesting and setting up your account before arriving at a customer's home.

Setting Up the Device

- **Important:** Create your account before setting up a device.
- **Remote Device (no screen):** Plug into the Cat5 port on the dehumidifier.
- **Display Device (screen):** Place in an accessible location to view. Plug into a standard 110v outlet.
- **Wi-Fi:** Connect the display device to Wi-Fi. To download the iOS app, scan the DryFi Dealer QR Code. For web instructions, visit www.controlmydehu.com/wifi.

Quick Start Guide

Understanding the Display

FCC Part 15 Regulatory Statements

§15.21 Information to user.

The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form.

§15.105 Information to the user.

(a) For a Class A digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual:

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

(b) For a Class B digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form

§15.19 FCC Required Labelling Statement placed in User Manual

Labeling requirement. Devices shall bear the following statement in a conspicuous location on the device:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

When the device is so small or for such use that it is impracticable to label it with the statement in a font that is four-point or larger, and the device does not have a display that can show electronic labeling, then the information required by this paragraph shall:

- be placed in the **user manual** and be placed on the device packaging **or** on a removable label attached to the device.

A minimum distance of 20cm between the radiator and a human body should be kept at all times.
